DAHLIAS

Prices Again Reduced

Despite a very dry growing season which has produced an extremely short crop we have again reduced our prices on a great many kinds. Our plan is to encourage the more general planting of Dahlias and to this end we are cooperating by working on the closest possible margin consistent with supplying the best quality roots and maintaining good service.

New Varieties Added

Each season we make liberal trials of a great many new varieties that have received prominent mention. Most of these prove to be worthless but those that show definite merit are added to our list, for it is our intention to maintain an up-to-date selection.

To Help Make Your Selection

Many customers ask us to recommend a list of varieties suitable to their purpose and in response to this request we have divided our whole list of large flowering varieties into three main groups as under:

Varieties designated *** This group is intended for those who want the leading commercial kinds in the low price range of roots.

Varieties designated ** This list contains kinds that have excellent cut flower qualities, but, being newer or rarer, are higher priced.

Varieties designated * These are mainly intended for garden use. Most of these have larger flowers which are usually too bulky or soft for general commercial use.

The initials behind each variety designate (I. D.) Informal Decorative; (F. D.) Formal Decorative; (C.) Cactus; (S. C.) Semi Cactus

TIGRIDIA PAVONIA

For brilliancy of color there are few floral subjects that can compare with Tigridias. The bulbs, which can be handled the same as Gladiolus, bloom in mid-summer. Each stalk produces several flowers and this prolongs the display.

For something strikingly beautiful and unusual we suggest these Tigridias.

Flowering Bulbs in themselves convey no impression in the customers' minds as to what they will produce and usually it is essential that the display of each variety be accompanied with an illustration showing exactly what the flower is like. This is very important in the sale of dry bulbs and roots over the counter. We have prepared a standard size 5½ x 7 display card for most of the varieties as shown in this list. These cards not only show the flower in natural color, but give the name of each and provide space for pricing. These cards are sent free with each order.
